Product Description

8 in 1 multifunctional Infrared Light RF Big Lipo Cavitation Vacuum Roller Body Slimming Beauty Machine

Technical Parameters of 8 in 1 multifunctional Infrared Light RF Big Lipo Cavitation Vacuum Roller Body Slimming Beauty Machine: The BS-SL7 combines multiple technologies for body slimming: vacuum lipo massage, infrared laser lipolysis, ultrasound cavitation, etc, which is approved to effectively reduce the appearance of cellulite, increase circulation, relieve minor muscle aches and pains, and relax muscle spasms.

The vacuum suction is like performing gymnastics on your skin and underlying tissue; suction and motorized vibrators massage your skin in a special way, thus exercising it. Gentle suction mobilizes your connective tissue and the vibrators help to increase circulation, thus facilitating exchange of fluid and clearance of fat. Infrared laser reduces skin impedance by heating skin and radio frequency energy penetrates deeply into connective tissue, and the synergistic combination of infrared laser and conducted radio frequency increases the oxygen intracellular diffusion by heating the tissue. Ultrasound cavitation can reduce unwanted fat, by passing energy deeply into human tissue, and under high-speed vibration. The heat generated will cause fat cells been resolved, thus get body slimming result.
