

1064nm 532nm Fractional Laser Machine , Pico Tattoo Removal Machine 2700W

Our Product Introduction

For more products please visit us on hifubeauty-machine.com

Basic Information

- Place of Origin: China Guangzhou
- Brand Name: Fractional laser machine
- Certification: CE
- Model Number: CPM-3

Product Specification

- Name: Picosure Laser Tattoo Removal Machine
- Maximum Energy: 2000M
- Laser Pulse: Pico Laser
- Laser Power: 2700W
- Voltage: AC220v±10% 50Hz, 110v±10% 60Hz
- Light Source: ND:YAG Solid Laser
- Wave Length: 1064nm, 532nm
- Other Name: Picosecond Laser
- Aiming Beam: Diode 655 Nm (Red), Adjustable Off/on
- Highlight: **1064nm Fractional Laser Machine,
532nm Fractional Laser Machine,
Pico Tattoo Removal Machine 2700W**

Product Description

2000M Twice Wave Laser Machine 1064nm / 532nm Picosecond Laser Tattoo Removal 2700W Laser Power

Product Description:

The 12-inch screen of the Picosecond Laser Machine provides an easy-to-use interface that allows users to easily customize and adjust the settings of the device to meet their specific needs. This machine is equipped with two different wave lengths, 1064nm and 532nm, which makes it a highly versatile device that can be used to treat a wide variety of skin conditions.

The Picosecond Laser Machine is a great option for those looking for a skin tightening treatment. It uses a unique fractional laser technology that helps to stimulate collagen production in the skin, which in turn helps to tighten and firm the skin. This device is also highly effective at removing tattoos, making it a great option for those looking to get rid of unwanted ink.

Overall, the Picosecond Laser Machine is a highly effective and versatile device that provides a wide range of benefits. Whether you're looking for a skin tightening treatment or a tattoo removal solution, this device is sure to provide you with the results you're looking for. It's a great alternative to other devices such as the 810 skin rejuvenation machine, Fractional laser machine, and IPL Laser Beauty Machine.

Technical Parameters:

Light Source	ND:YAG Solid Laser
Feature	Skin Tightening, Tattoo Removal
Voltage	AC220v±10% 50Hz, 110v±10% 60Hz
Screen	12inch
Laser Pulse	Pico Laser
Energy Density	≤ 0.6 J/cm ²
Aiming Beam	Diode 655 Nm (Red), Adjustable Off/on
Maximum Energy	2000M
Wave Length	1064nm, 532nm
Laser Power	2700W

This Aesthetic Laser Machine, also known as Superpicosecond freckle machine or Laser beauty machine, has the technical specifications listed above.

Customization:

Our Picosecond Laser Machine, also known as the Fractional Laser Machine, model CPM-3, is a top-of-the-line Aesthetic Laser Machine that is customizable based on your specific needs.

Our Laser Skin Rejuvenation Machine has a maximum energy of 2000M and an energy density of ≤ 0.6 J/cm², making it a powerful tool for improving the appearance of skin imperfections.

The Light Source of our DPL Laser Machine is an ND:YAG Solid Laser, which is highly effective for removing pigmented lesions, tattoos, and other skin blemishes. The Touch Screen Size is 12 inches, allowing for easy operation and customization.

In addition, our Picosecond Laser Machine has an Aiming Beam with a Diode 655 Nm (Red) that is adjustable on or off. This feature allows for precise targeting of the treatment area.

Our Laser Skin Rejuvenation Machine is manufactured in China Guangzhou and can be customized to meet your specific needs. Contact us today to learn more about our product customization services.

Support and Services:

The Picosecond Laser Machine is a high-tech and advanced laser equipment designed for various applications such as tattoo removal, skin rejuvenation, pigmentation removal, and many others. It is equipped with state-of-the-art technology that allows for precise and efficient treatment with minimal to no downtime.

Our product technical support and services include:

Expert consultation on machine installation and operation

24/7 customer service and technical support

On-site training for machine operation and maintenance

Regular maintenance and calibration services to ensure optimal performance

Replacement of defective parts and components, if necessary

Upgrade and customization options to meet specific customer needs and requirements

Our team of highly skilled technicians and engineers are dedicated to providing the best technical support and services to ensure customer satisfaction and success. Contact us to learn more about our product technical support and services.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is Fractional laser machine.

Q: What is the model number of this product?

A: The model number of this product is CPM-3.

Q: Where is this product made?

A: This product is made in China Guangzhou.

Q: What is the wavelength of the picosecond laser?

A: The wavelength of the picosecond laser is 755nm, 1064nm, and 532nm.

Q: What is the maximum energy output of this laser machine?

A: The maximum energy output of this laser machine is 800mj.
