Product Description

Picosecond Laser Tattoo Removal Machine With ND Light Source

Product Description:

One of the standout features of this laser system is its large 12-inch touch screen, which makes it incredibly user-friendly and easy to operate. This touch screen interface allows you to customize treatments and adjust settings with ease, making it an ideal choice for busy clinics and spas.

The Superpicosecond freckle machine also boasts a range of spot sizes, ranging from 2mm to 10mm, making it ideal for treating different areas of the body. This means that you can use this laser skin rejuvenation machine to target everything from small blemishes to larger areas of the skin, without compromising on precision or accuracy.

In terms of power, the Superpicosecond freckle machine is a real powerhouse, with a laser power output of 2700W. This means that it can deliver fast and effective treatments, even on tough-to-treat areas of the skin. Whether you're using it for skin tightening or tattoo removal, this machine is sure to deliver exceptional results.

Overall, the Superpicosecond freckle machine is an incredibly versatile and effective IPL Laser Beauty Machine that is ideal for busy clinics and spas. Whether you're looking to tighten sagging skin, remove unwanted tattoos, or perform a range of other cosmetic treatments, this laser system is sure to deliver exceptional results every time.

Maximum Energy	2000M
Energy Density	≤ 0.6 J/cm²
Spot Size	2-10 Mm
Touch Screen Size	12 Inch
Screen	12inch
Voltage	AC220v±10% 50Hz, 110v±10% 60Hz
Feature	Skin Tightening, Tattoo Removal

This table shows the technical parameters of the Picosecond Laser Machine, also known as the DPL Laser Machine or Laser beauty machine. It is an Aesthetic Laser Machine used for skin tightening and tattoo removal.

Applications:

The CPM-3 Fractional laser machine is the perfect choice for beauty clinics and aesthetic centers that are looking to offer their clients a comprehensive range of laser treatments. With a spot size of 2-10 mm and a maximum energy of 2000M, this machine can effectively treat a wide range of skin issues, including wrinkles, fine lines, acne scars, and pigmentation. The device is equipped with a 12-inch touch screen that makes it easy to operate and allows users to easily adjust the laser power and settings to suit their specific needs. The laser power of the CPM-3 Fractional laser machine is 2700W, which ensures that the device can effectively deliver the required energy to the skin for optimal results.

The CPM-3 Fractional laser machine is a ND:YAG solid laser device that is known for its high performance and accuracy. It is suitable for use in a variety of clinical settings, including IPL Laser Beauty Machine clinics, Aesthetic Laser Machine clinics, and 810 skin rejuvenation machine clinics.

In summary, the CPM-3 Fractional laser machine is a powerful and versatile device that is designed to deliver optimal laser treatments for a wide range of skin issues. Its advanced technology, high-performance laser power, and easy-to-use touch screen make it the ideal device for beauty clinics and aesthetic centers that are looking to offer their clients the latest and most effective laser treatments available.
