## Product Description

### LB-100 Energy Laser Beauty Machine For Hair Removal

#### Product Description:

The LB-100 is a portable device that is easy to use and delivers fast, effective results. The device is equipped with 5 treatment probes, each of which is designed to target specific areas of the skin. Whether you want to treat fine lines and wrinkles, acne, or hyperpigmentation, this device has a treatment probe that can help you achieve your desired results.

The LB-100's pulse width of 0.02~0.99s ensures that the device is able to deliver precise and effective treatments every time. Whether you're using the device at home or in a professional setting, you can be confident that you're getting the best possible results.

In addition to its impressive technical specifications, the LB-100 is also a stylish and portable device that is designed to fit seamlessly into your daily routine. Whether you're using the device at home or on the go, you can be confident that you're getting the best possible results.

Overall, the LB-100 Diode Laser Beauty Machine is a must-have device for anyone who wants to achieve professional-grade results from the comfort of their own home. With its advanced technical specifications, stylish design, and portability, this device is the perfect choice for anyone who wants to look and feel their best.

#### Features:

This table shows the technical parameters of the Laser Beauty Machine, which is a type of aesthetic laser machine suitable for commercial use in beauty salons, spas, and at home. The machine has a portable style and comes equipped with 5 treatment heads. It has an output power of 40W and a screen size of 15.6 inches. The energy density ranges from 1-10J/cm<sup>2</sup>, and the pulse width is 0.02~0.99s. The Laser Bar Number is 3\*755nm; 4\*808nm; 3\*1064nm and the screen is an 8-inch touchscreen.

#### Applications:

The five treatment heads of the Laser Beauty Machine make it a versatile machine that can be used for various beauty treatments. The spot diameter of the machine is adjustable between 6mm-14mm, making it suitable for different skin types and treatment areas. The machine is safe, effective, and provides long-lasting results.

The Laser Beauty Machine can be used for various beauty treatments, including hair removal, skin rejuvenation, acne treatment, and pigmentation removal. The machine can also be used for Hydrafacial treatments, which are becoming increasingly popular among beauty enthusiasts. The Hydrafacial Beauty Machine can help in removing dead skin cells, unclogging pores, and hydrating the skin, leaving it soft, supple, and radiant.

The Fractional Co2 Laser Beauty Machine is another application of the Diode Laser Beauty Machine. It is a non-invasive treatment that can help in reducing fine lines, wrinkles, and scars. The machine can also be used for skin resurfacing, improving skin texture and tone,

and treating sun damage. The Fractional Co2 Laser Beauty Machine is ideal for commercial users looking to provide professional beauty services to clients.

The Laser Beauty Machine is suitable for commercial beauty centers, spas, and clinics that cater to the beauty needs of clients. The machine is easy to use, and the different treatment heads make it a versatile machine that can be used for various beauty treatments. The adjustable spot diameter of the machine makes it suitable for different skin types and treatment areas, ensuring that clients get the best results possible.

### Customization:

Customize your Diode Laser Beauty Machine to fit your needs with our Product Customization Services.
