Product Description

1.5mm-2.5mm Spot Space Skin Rejuvenation Machine With Single/Continuous Treatment Modes

Product Description:

One of the key features of this machine is its customizable options. It offers OEM and ODM services, meaning that users can tailor the device to their specific needs and preferences. The nano microneedle size is 1.5*5*0.24mm, allowing for precise and efficient treatment. The spot space is also adjustable, ranging from 1.5mm to 2.5mm in increments of 0.1mm, ensuring that the treatment area is covered thoroughly and evenly.

The Skin Rejuvenation Machine also boasts impressive energy output capabilities. With a range of 0.5-5J, users can select the ideal energy output for their specific treatment needs. Additionally, the IPL power of 200W ensures that the device is powerful enough to produce noticeable and long-lasting results.

Whether you're looking to reduce cellulite, rejuvenate your skin, or simply improve your overall appearance, the Skin Rejuvenation Machine is the perfect solution. With its advanced features and customizable settings, it's sure to become a staple in your beauty routine.

Plugs Type	Other, AU, UK, EU, US, CN, JP, Za, It
Spacing	1.0-10mm(0.5mm/step)

Operation	Easy
Face Wrinkle Removal Machine	
Cellulite Removal Machine	

Applications:

One popular application for our Skin Rejuvenation Machine is cellulite removal. The 4.5mm cartridge is perfect for targeting cellulite on the thighs, hips, and buttocks. With its precise spot space (1.5mm-2.5mm) and energy output (0.5-5J), this machine can effectively break down cellulite and improve the overall texture and appearance of the skin.

Another great use for our Skin Rejuvenation Machine is as a face moisturizer machine. The 1.5mm cartridge is ideal for treating fine lines and wrinkles on the face, while the 3.0mm cartridge can target deeper layers of the skin for a more intensive treatment. With its customizable energy output and spot space, this machine can help to stimulate collagen production and improve skin hydration for a more youthful and radiant complexion.

Our Skin Rejuvenation Machine is also a fantastic facial skin analyzer machine. By using the 1.5mm cartridge, estheticians and dermatologists can analyze the skin's layers and identify any areas of concern, such as pigmentation, fine lines, or acne. With this information, they can then customize a treatment plan using the appropriate cartridge and energy settings to address each issue and achieve optimal results.

At our company, we offer OEM and ODM services for our Skin Rejuvenation Machine, allowing our clients to customize the machine's design and features to best suit their needs. Whether you are looking to offer cellulite removal treatments, facial rejuvenation services, or skin analysis consultations, our Skin Rejuvenation Machine is a versatile and effective tool that can help you achieve your goals.

Customization:

Customize your Face Moisturizer Machine with our Skin Rejuvenation Machine's powerful IPL technology. With 200W of IPL power and a spot space of 1.5mm-2.5mm (step 0.1mm), you can target specific areas of your skin for optimal results. Our services include OEM and ODM, allowing you to customize the machine to your brand's specific needs. Choose from a variety of cartridges, including 1.5mm, 3.0mm, 4.5mm, and 13mm (optional), to achieve your desired energy output of 0.5-5J. Trust our DPL Skin Rejuvenation Machine to provide you with the customized skin care you deserve.
