Product Description

Professional 7200K Color Temperature Skin Analyzer With Magnifying Lamp

Product Description:

Whether you are a professional skin care expert or simply someone who wants to take better care of their skin, the Handheld Skin Analyzer is an invaluable tool that can help you achieve your goals. With a working environment temperature range of 10 – 35 Celsius Degrees, this machine is suitable for use in a wide range of settings, and can be easily transported from one location to another. One of the key features of the Face Analyzer Machine is its ability to produce detailed PDF reports of your skin analysis results. This means that you can easily share your findings with others, whether you are working with a client or simply want to keep track of your own skin health over time. With a YES for Pdf Print attribute, you can be sure that your results will be easy to read and understand. Another important feature of this machine is its power supply. With an AC 100-240V, 50/60Hz power supply, it is compatible with a wide range of electrical systems, making it perfect for use in a variety of different countries and settings. One of the most impressive aspects of the Handheld Skin Analyzer is its ability to detect a wide range of skin problems. With 12 different skin problems detected, this machine is able to identify everything from wrinkles and fine lines to acne and hyperpigmentation, making it an incredibly versatile tool for anyone who wants to improve the health and appearance of their skin.

Features:

Product Name: Skin Analysis Machine

Color Temperature: 7200 K

Magnifier: Yes

Type: Portable

Operating System: RGB +UV

Working Environment: 10 – 35 Celsius Degrees

This Face Analyzer Machine is a portable Facial Skin Analyzer Machine with a color temperature of 7200 K. It includes a magnifier and operates on an RGB + UV system. It is best used in a working environment between 10 – 35 Celsius Degrees. This machine is one of the best Facial Skin Care Devices on the market.
