Product Description

USB 2.0 Port Skin Analyzer With Magnifier For Skin Detection

Product Description:

The machine uses a color temperature of 7200 K, which is ideal for analyzing the skin and providing accurate results. It also requires a computer with Windows XP/Vista/7/8/10, making it easy to use and compatible with most computers. The working environment for this machine is between 10 – 35 Celsius Degrees, ensuring accurate results no matter where you are.

The Facial Skin Analyzer is a type of portable machine, which means you can take it with you wherever you go. Whether you are a professional dermatologist or just someone who wants to take care of their skin, this machine is perfect for you. It is lightweight and easy to carry, making it an ideal tool for people who travel frequently.

The power supply for this machine is AC 100-240V, 50/60Hz, which means it can be used anywhere in the world. This makes it a versatile tool that can be used in a variety of settings, from spas and salons to private homes.

In addition to being a facial skin analyzer, this machine can also be used as a handheld skin analyzer and a facial dermabrasion machine. This means that it can be used to perform a variety of skin treatments, including exfoliation and deep cleansing. It is a versatile and effective tool that can help you keep your skin looking youthful and healthy.

Features:

Product Name: Skin Analysis Machine

Packing Size: L68xW49xH51cm

Computer Requirement: Windows XP/Vista/7/8/10

Color Temperature: 7200 K

Power Supply: AC 100-240V, 50/60Hz

Working Environment: 10 – 35 Celsius Degrees

Features:

Facial Skin Care Machines

DPL Skin Rejuvenation Machine

Body Analyzer Machine

Technical Parameters:

Facial Skin Analyzer Technical Parameters	
Operating System	RGB + UV
Usb Port	2.0
Camera Sensor Model	CCD1/1.7
Type	Portable
Problems Detected	12 Skin Problem Detected
Color Temperature	7200 K
Magnifier Rate	2 X
Packing Size	L68xW49xH51cm
Power Supply	AC 100-240V, 50/60Hz

This Facial Skin Analyzer is a type of Digital Skin Analyzer, which is widely used in Facial Skin Care Devices.

Applications:

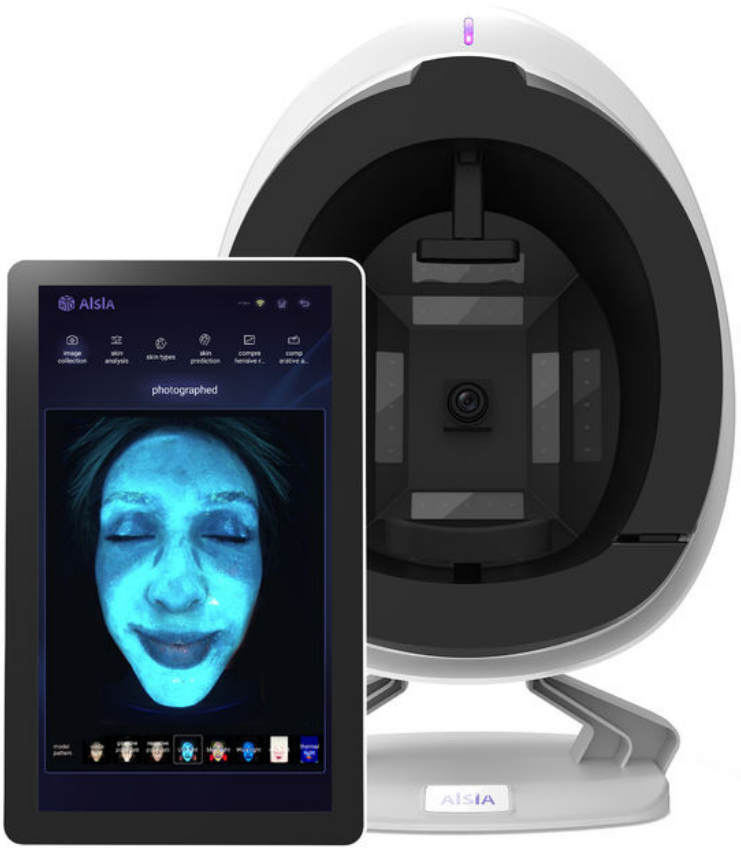

The Skin Analysis Machine is perfect for use in a variety of different settings. For facialists, it can be used as part of a facial treatment to diagnose skin problems and determine the best course of action for improving the skin's health and appearance. It can also be used in medical settings, allowing dermatologists to accurately diagnose skin conditions and prescribe the appropriate treatments.

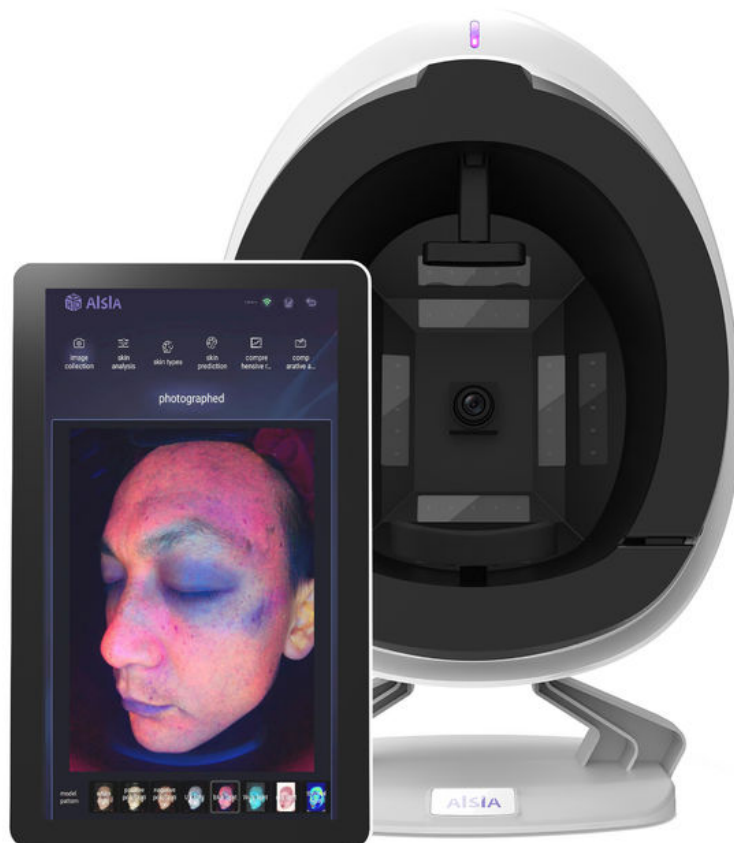

The Skin Analysis Machine is an ideal tool for use in beauty salons, where it can be used as part of a facial dermabrasion machine, helping to remove dead skin cells and promote the growth of healthy, new skin. It can also be used as an acne removal machine, helping to identify the underlying causes of acne and developing a customized treatment plan for each client.

The Skin Analysis Machine is also a great tool for personal use. For individuals looking to improve their skincare routine, the machine can be used to diagnose skin problems and track progress over time. It can help users to identify which products and treatments are most effective for their skin type, allowing them to make informed decisions about their skincare regimen.

In summary, the Skin Analysis Machine is a versatile and essential piece of equipment for anyone interested in improving their skin's

health and appearance. Whether used in a professional setting or for personal use, this innovative device can help to diagnose a wide range of skin problems, making it an invaluable tool for anyone looking to achieve beautiful, healthy skin.

Customization:
