Product Specification

• Size:	360x450x1250mm
Power:	40 Watts
• Laser Type:	Fractional CO2 Laser
Laser Arm Origin:	From South Korea
Headpiece:	Fractional, Vaginal, Normal Cut
Output Mode:	Ultra Pulse, Single Pulse, Fractional
Net Weight:	45kg
Aiming Beam:	650nm, ≤5mw
Name:	RF Fractional CO2 Laser
Highlight:	Ultra Pulse Radiofrequency Fractional CO2 Laser , Radiofrequency Fractional CO2 Laser 40W

Professional Fractional CO2 Laser With Ultra Pulse For Pigmentation Removal

Product Description:

The Fractional CO2 Laser is the laser type used in this device, providing a powerful 40 Watts of laser power. This laser type is commonly used for skin resurfacing, wrinkle reduction, scar treatment, and more. The Fractional technology allows for precise targeting of treatment areas, reducing downtime and side effects.

This CO2 Fractional Laser Machine is designed with portability in mind, making it easy to transport between treatment rooms or clinics. It also features a 532 nm KTP Laser for added versatility in treating vascular lesions and pigmentation.

Overall, the RF Fractional CO2 Laser Machine is a versatile and powerful medical grade laser device, capable of providing a wide range of skin treatments with precision and minimal downtime. Its portability and inclusion of multiple headpieces make it a valuable addition to any clinic or practice.

Features:

Product Name: RF Fractional CO2 Laser Net Weight: 45kg Operation System: Ultrasonic Style: Portable Language: Multi-language Laser Type: Fractional CO2 Laser CO2 Laser Safety Goggles included CO2 Fractional Laser Machine for beauty treatments Fractional Co2 Laser Beauty Machine for skin resurfacing

Technical Parameters:

Product	CO2 Fractional Laser
Net Weight	45kg
Laser Working Mode	Continuous
Language	Multi-language
Headpiece	Fractional, Vaginal, Normal Cut
Light Guiding System	7 Joints Arm
Operation System	Ultrasonic
Output Mode	Ultra Pulse, Single Pulse, Fractional
Aiming Beam	650nm, ≤5mw
Size	360x450x1250mm
Fractional Working Mode	Interval Continuous Working
Product Type	Skin Rejuvenation Fractional CO2 Laser Machine, DPL Laser Machine

Applications:

The Fractional RF Machine is ideal for use in beauty clinics, spas, and salons. It can be used to treat a wide range of skin concerns, including wrinkles, fine lines, acne scars, sun damage, and hyperpigmentation. The machine is suitable for use on all skin types and can be customized to suit the needs of each individual client.

The Fractional 4D CO2 Machine headpiece is designed to deliver precise and controlled energy to the skin, resulting in improved texture, tone, and firmness. The headpiece can be used for a variety of treatments, including skin resurfacing, scar revision, and stretch mark reduction. The machine is also equipped with a Vaginal headpiece that can be used for laser vaginal rejuvenation.

The RF Fractional CO2 Laser product is made in China Guangzhou and is available in multiple languages, making it accessible to a wide range of clients. The machine is designed to operate in Interval Continuous Working mode, which ensures that the skin is treated with the appropriate amount of energy while minimizing the risk of damage.

The Fractional CO2 Laser technology used in the machine is of the highest quality and is sourced from South Korea. The laser arm is also sourced from South Korea, ensuring that the machine is reliable and efficient. With its advanced technology and versatile headpieces, the RF Fractional CO2 Laser product is the perfect solution for beauty professionals who want to provide their clients with the latest and most effective treatments.

Customization: FAQ:

Q: What is RF Fractional CO2 Laser?

A: RF Fractional CO2 Laser is a medical device that uses radio frequency energy and carbon dioxide laser technology to treat skin conditions such as scars, wrinkles, and hyperpigmentation.

Q: Where is RF Fractional CO2 Laser manufactured?

A: RF Fractional CO2 Laser is manufactured in Guangzhou, China.

Q: How does RF Fractional CO2 Laser work?

A: RF Fractional CO2 Laser works by creating tiny microscopic holes in the skin, which stimulates the body's natural healing process and promotes collagen production. This results in smoother, more youthful-looking skin.

Q: Is RF Fractional CO2 Laser safe?

A: Yes, RF Fractional CO2 Laser is safe when used by a qualified and experienced medical professional. However, as with any medical procedure, there are some risks and potential side effects, such as redness, swelling, and temporary discoloration of the skin. Q: What can I expect during and after RF Fractional CO2 Laser treatment?

A: During the treatment, you may feel a mild to moderate discomfort, but the medical professional will apply a topical anesthetic to minimize any pain or discomfort. After the treatment, you may experience some redness and swelling, but this should subside within a few days. It is important to follow the aftercare instructions provided by the medical professional to ensure proper healing and optimal results.
