Product Description

Made In China 40 Watts RF Fractional CO2 Laser For Derma Skin Resurfacing And Laser Therapy

Product Description:

Manufactured in South Korea, the RF Fractional CO2 Laser is a high-quality and reliable machine that offers outstanding performance and durability. It is built with advanced technology, ensuring that it delivers precise and efficient treatments every time. The laser arm origin is from South Korea, which is a testament to the quality of the product.

The machine is designed to be portable, making it easy to move around the clinic or salon. This feature is particularly useful for businesses with limited space or mobile beauty services. Despite its portability, the machine is sturdy and can withstand regular use without getting damaged.

One of the key advantages of the RF Fractional CO2 Laser is its multi-language support. The machine can be set to various languages, making it accessible to clients from different parts of the world. This feature is particularly useful for businesses that cater to a diverse clientele.

The net weight of the RF Fractional CO2 Laser is 45kg, which is relatively light compared to other laser machines on the market. This feature makes it easy to move the machine around without causing any strain on the user.

The RF Fractional CO2 Laser comes with a handpiece that has three different treatment options: Fractional, Vaginal, and Normal Cut. The Fractional handpiece is designed to treat skin imperfections such as scars, wrinkles, and fine lines. The Vaginal handpiece is designed to address vaginal laxity, dryness, and urinary incontinence. The Normal Cut handpiece is designed for surgical procedures such as mole removal and skin tag removal.

In summary, the RF Fractional CO2 Laser is a high-quality machine that combines the benefits of CO2 Fractional Machine and ND YAG Laser Machine technology. It is manufactured in South Korea and is designed to be portable, multi-lingual, and lightweight. It comes with a handpiece that offers three different treatment options, making it an ideal option for clinics and beauty centers seeking to offer a wide range of aesthetic treatments to their clients.

C02 Fractional laser

3 system: Cutting, Fractional, Vaginal treatment

Fractional co2 Laser for skin rejuvenation and scar removal

PRODUCT DESCRIPTION

Technical Parameters:

Headpiece	Fractional, Vaginal, Normal Cut
Fractional Working Mode	Interval Continuous Working
Aiming Beam	650nm, ≤5mw
Laser Power	40 Watts
Laser Working Mode	Continuous
Laser Type	Fractional CO2 Laser
Laser Arm Origin	From South Korea
Style	Portable
Output Mode	Ultra Pulse, Single Pulse, Fractional
Operation System	Ultrasonic

For safe use, CO2 Laser Safety Goggles are recommended. The product can also be used with a 532 nm KTP Laser. This is a Fractional Co2 Laser Machine.

Applications:

The RF Fractional CO2 Laser is a portable style beauty machine that can be used in a wide range of application occasions and scenarios. Here are some of the most common applications:

Acne Scars and Hyperpigmentation Treatment

The RF Fractional CO2 Laser is highly effective for treating acne scars and hyperpigmentation. It can penetrate deep into the skin to stimulate collagen and elastin production, which helps to smooth out scars and even out skin tone. This treatment is ideal for those who have tried other treatments without success.

Wrinkle Reduction and Skin Tightening

The RF Fractional CO2 Laser is also highly effective for reducing wrinkles and tightening loose skin. It can stimulate collagen production, which helps to plump up the skin and reduce the appearance of fine lines and wrinkles. This treatment is ideal for those who want to achieve a more youthful, refreshed appearance.

Skin Resurfacing

The RF Fractional CO2 Laser is also ideal for skin resurfacing. It can remove the outer layers of skin to reveal the smoother, more youthful-looking skin underneath. This treatment is ideal for those who have sun damage, age spots, or other skin imperfections.

Stretch Mark Reduction

The RF Fractional CO2 Laser is also effective for reducing the appearance of stretch marks. It can penetrate deep into the skin to stimulate collagen production, which helps to fill in the stretch marks and make them less noticeable. This treatment is ideal for those who have tried other treatments without success.

The RF Fractional CO2 Laser is a highly versatile and effective beauty machine that can be used in a wide range of application occasions and scenarios. Whether you are looking to reduce wrinkles, tighten loose skin, or treat acne scars and hyperpigmentation, this DPL Laser Machine can help you achieve your beauty goals.

Customization:

FAQ:

A: The Place of Origin for the RF Fractional CO2 Laser is China Guangzhou.

Q: What is the recommended usage for the RF Fractional CO2 Laser?

A: The RF Fractional CO2 Laser is recommended for use in skin resurfacing, scar reduction, wrinkle reduction, and skin tightening treatments.

Q: How does the RF Fractional CO2 Laser work?

A: The RF Fractional CO2 Laser uses a combination of radiofrequency energy and CO2 laser technology to create microscopic channels in the skin, which stimulates the skin's natural healing process and promotes collagen production.

Q: Is the RF Fractional CO2 Laser safe?

A: Yes, the RF Fractional CO2 Laser is safe when used by a trained professional. However, as with any medical procedure, there are potential risks and side effects that should be discussed with your healthcare provider.

Q: What is the downtime after a RF Fractional CO2 Laser treatment?

A: The downtime after a RF Fractional CO2 Laser treatment varies depending on the intensity of the treatment and the individual's healing process. Typically, there is some redness and swelling for a few days, and the skin may peel or flake for several days to a week after the treatment.
