Laser Bar Number	3*755nm; 4*808nm; 3*1064nm
Style	Portable
Energy Density	1-10J/cm ²
Pulse Width	0.02~0.99s
Screen	8-inch Touchscreen
Treatment Probes	5 Pieces
Model	LB-100
Frequency	1-6Hz

Applications:

The portable style of the Co2 Laser Beauty Machine makes it convenient for usage in various locations such as beauty salons, spa, and even at home. It is an excellent addition to any beauty routine as it is easy to use and does not require any special skills or expertise. This beauty device is highly recommended for individuals who are looking for a non-invasive method to enhance their skin's appearance.

The Co2 Laser Beauty Machine is equipped with an output power of 40W, which ensures that the device works efficiently and effectively. It has an energy density of 1-10J/cm², which means that it can penetrate deep into the skin's layers to stimulate collagen production. The pulse width of the device ranges from 0.02~0.99s, which allows for precise control during usage, ensuring that the skin is not damaged during the process.

There are various occasions and scenarios where the Co2 Laser Beauty Machine can be used. For individuals who have a busy schedule and do not have the time to visit a beauty salon, this device is perfect for home usage. It can be used in the comfort of their own home, allowing them to save time and money on beauty treatments. Beauty salons and spas can use this device to offer their clients a unique and effective skincare treatment that will leave their skin looking youthful and vibrant.

The minimum order quantity for the Co2 Laser Beauty Machine is 1, which makes it accessible for personal and commercial usage. It is a versatile device that can be used for various skin types and conditions, making it an essential tool for any beauty professional or enthusiast.

Support and Services:

Our Laser Beauty Machine product has a dedicated technical support team ready to assist you with any issues you may encounter. Our team is highly trained and knowledgeable in all aspects of the product, from installation to troubleshooting.

In addition to technical support, we also offer a variety of services to ensure your machine is always operating at peak performance.

These services include regular maintenance and calibration, as well as repairs and replacements for any damaged parts.

We strive to provide the best possible support and services to our customers, and are committed to ensuring your satisfaction with our product.
