Vacuum Pressure: 10-80KPa

Work Model: Pulse

#### Technical Parameters:

Cavitation:	40K
Service:	OEM ODM
Laser Wavelength:	Laser Diode AlGaInp 635-650nm
Vacuum Pressure:	10-80KPa
Certifications:	CE
Temperature:	-15~5 °C
Frozen Head Pressure:	0-100kpa
Lipolaser:	Diodes Liposlim For Fat Removal
Treatment Areas:	Abdomen, Thighs, Arms, Love Handles, Back
Freezing Temperature:	-15-5°C

## Applications:

One of the best applications for the Cryolipolysis Fat Freezing Machine is in beauty clinics or salons. Clients who are seeking weight loss treatments can benefit from this machine. The machine can be used to target specific areas of the body where fat is stubborn, such as the abdomen, thighs, and arms. The machine applies controlled cooling to these areas, causing the fat cells to freeze and die. Over time, the body naturally eliminates the dead fat cells, resulting in a slimmer appearance.

The Cryolipolysis Fat Freezing Machine is also suitable for individuals who are looking for a non-invasive alternative to liposuction. Unlike liposuction, the machine does not require any incisions or anesthesia. The procedure is painless and does not require any downtime. This makes it a popular choice for individuals who have busy schedules but still want to improve their appearance.

The machine is also ideal for fitness centers or gyms. Clients who are trying to lose weight can use the Cryolipolysis Fat Freezing Machine to supplement their workout routine. The machine can be used in conjunction with exercise to help target stubborn areas of fat. It is a great way to boost the results of a fitness program and help clients achieve their weight loss goals.

The Cryolipolysis Fat Freezing Machine is a versatile product that can be used in many different scenarios. It is an excellent option for individuals who want to lose weight without surgery or for those who want to supplement their fitness routine. The product can be customized to suit the needs of different clients through OEM ODM services, making it a great investment for any business in the beauty or fitness industry.

## Customization:

Product Customization Services:

Brand Name: Laser freezing weight loss machine

Place of Origin: China Guangzhou

Laser Wavelength: Laser Diode AlGaInp 635-650nm

Frozen Head Pressure: 0-100kpa

Service: OEM ODM

Lipolaser: Diodes Liposlim For Fat Removal

It is a Fat Freezing Machine that uses Laser Diode AlGaInp 635-650nm to freeze fat cells and Diodes Liposlim for fat removal. The machine also has a Cavitation RF Slimming Machine feature that can help achieve a more toned and youthful-looking body. With its pulse work model and frozen head pressure that can be adjusted from 0-100kpa, this Body Slimming Machine can provide a customized and comfortable experience for clients.

## FAQ:

Q: What is the brand name of this slimming machine?

A: The brand name of this slimming machine is Laser freezing weight loss machine.

Q: Where is this slimming machine made?

A: This slimming machine is made in China Guangzhou.

Q: What is the principle behind Cryolipolysis?

A: Cryolipolysis is a non-invasive fat reduction treatment that uses controlled cooling to freeze and eliminate fat cells. The principle behind

this treatment is that fat cells are more susceptible to cold temperatures than surrounding tissues, so they can be safely targeted and destroyed without damaging the skin or other tissues.

Q: What areas of the body can be treated with this slimming machine?

A: This slimming machine can be used to treat various areas of the body, including the abdomen, love handles, thighs, and upper arms.

Q: Is this slimming machine safe and effective?

A: Yes, this slimming machine is safe and effective. It is a non-invasive treatment that does not require surgery or anesthesia, and it has been clinically proven to reduce fat in treated areas by up to 25%. However, individual results may vary depending on factors such as age, weight, and overall health.
