- Application: For Commercial
- Energy Density: 1-10J/cm²
- Highlight: 6 Wavelength Laser Beauty Machine,
IPL Laser Beauty Machine,
IPL Intense Pulsed Light Machine

Product Description

6-Wavelength IPL Laser Beauty Machine Adjustable 6-14mm Spot 0.02s-0.99s Pulse 8 Touchscreen

Product Description:

One of the key features of this machine is its ability to perform fractional laser treatments. This means that it delivers laser energy in a fractionated pattern, which minimizes damage to surrounding tissue and promotes faster healing. The result is smoother, tighter, and more youthful-looking skin.

In addition to fractional laser treatments, this machine also includes an E Light Beauty Machine for hair removal and skin rejuvenation. The E Light technology combines intense pulsed light (IPL) with radiofrequency (RF) energy to target hair follicles and stimulate collagen production. This allows for effective hair removal and skin tightening without the pain and downtime associated with traditional laser treatments.

Whether you're a beauty salon owner, a spa professional, or simply someone who wants to improve their skin at home, the Fractional Co2 Laser Beauty Machine is an excellent choice. Its energy density of 1-10J/cm² allows for customizable treatments based on skin type and condition, while its intuitive controls and user-friendly design make it easy to use.

In summary, the Fractional Co2 Laser Beauty Machine is a versatile and effective tool that can help you achieve your beauty goals. With its multiple treatment probes, fractional laser technology, and E Light Beauty Machine for hair removal and skin rejuvenation, this machine is suitable for a wide range of applications. Whether you're looking to start a new beauty business, upgrade your existing equipment, or simply improve your own skin at home, the Fractional Co2 Laser Beauty Machine is a smart investment.

Features:

Product Name: Laser Beauty Machine

Model: LB-100

Frequency: 1-6Hz

Spot Diameter: 6mm-14mm Adjustable

Pulse Width: 0.02~0.99s

Energy Density: 1-10J/cm²

Our Laser Beauty Machine is a versatile IPL Laser Beauty Machine that can perform various treatments including hair removal. It is also a Fractional Co2 Laser Beauty Machine that can help improve skin texture and reduce wrinkles.

Applications:

One of the main applications of the LB-100 laser beauty machine is for hair removal. This device is a home laser hair removal machine that uses diode laser technology to target hair follicles and prevent future hair growth. It is safe and effective for use on all skin types and tones. The LB-100 is perfect for those who want to save time and money by doing their hair removal at home.

Another application of the LB-100 laser beauty machine is for aesthetic treatments. This device can be used to treat a variety of skin conditions, including acne scars, sun damage, and wrinkles. The diode laser technology targets the affected areas, stimulating collagen production and improving overall skin texture and tone. This makes the LB-100 an ideal choice for beauty salons and spas that want to offer a range of aesthetic treatments to their clients.

Thanks to its portable design, the LB-100 laser beauty machine can be used in a variety of scenarios. It is lightweight and easy to transport, making it perfect for mobile beauty therapists who need to travel to their clients. The LB-100 is also ideal for home use, as it can be easily stored in a cupboard or drawer when not in use.

Overall, the LB-100 laser beauty machine is a versatile and effective device that is suitable for a range of beauty applications. Whether you are a beauty therapist, spa owner, or someone who wants to do their hair removal at home, the LB-100 is a great choice. With a minimum order quantity of just one, you can easily add the LB-100 to your beauty toolkit today.

Support and Services:

The Laser Beauty Machine is a high-tech device that requires specialized technical support and services to ensure optimal performance and longevity. Our team of experienced technicians provides comprehensive product support, including:

Installation and setup assistance

Ongoing maintenance and repair services

Software updates and upgrades

Technical troubleshooting and problem-solving

Training and education for users and operators

Our goal is to provide exceptional service and support to our customers, so they can get the most out of their Laser Beauty Machine. If you have any questions or concerns, please don't hesitate to contact us for assistance.
